THER DAINERD SURVIES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME:

Monsanto Company

MICIPAS, THERE HAS BEEN PRESENTED TO THE

Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED DISTINCT VARIETY OF SEXUALLY REPRODUCED, OR TUBER PROPAGATED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF TWENTY YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, RECONDITIONING IT FOR PROPAGATION, OR STOCKING IT FOR ANY OF THE ABOVE PURPOSE, OR CONDITIONING IT PROPAGATION, OR STOCKING IT FOR ANY OF THE ABOVE PURPOSE, OR USING IT IN PRODUCING A HYBRID OR SAIT VARIETY THEREFROM, TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT. IN SECURIOR OF THE SEED OF THIS VARIETY (I) SHALL BE SOLD BY VARIETY NAME ONLY AS A CLASS OF CERTIFIED SHALL CONFORM TO THE NUMBER OF GENERATIONS SPECIFIED BY THE OWNER OF THE RIGHTS. (84 STAT. 1542, AS 10.7 U.S.C. 2321 ET SEO.)

: WHEAT, COMMON

'Burchett'

In Testimone Aberest, I have hereunto set my hand and caused the seal of the Plant Bariety Frotection Office to be affixed at the City of Washington, D.C. this nineteenth day of Warch," in the year two thousand and four.

Attest

Minh Glimelini Acting Commissioner Plant Variety Protection Office Agricultural Marketing Service

Secretary

Exhibit A. Origin and Breeding History of Burchett

Burchett is a cross between W91-126/WI88-052-05. W91-126 is a cross between 84PYI003-106/INT.S/W#47. 84PYI003-106 is a cross between F2SPS-102 a F2 plant selection from a bulk of 55 winter wheat crosses and Tam 101. INT.S/W#47 is a F3 plant selected from a bulk population consisting of Sturdy winter wheat crossed with 20 CIMMYT spring wheat experimental lines. WI88-052-05 is a cross between 82F2024#24/Mesa. 82F2024#2 is a cross between C78-244/Archer.

The cross that produced Burchett was made in 1992 in Berthoud, CO. It was designated 92x0462. The F1 was grown in the greenhouse and the F2 planted in 1993 at Nardin, OK. The population was selected based upon maturity, disease resistance and agronomic type. F3 seed was planted in 1994 at Berthoud, CO and individual plants selected based upon maturity, plant height, disease resistance and agronomic type. F4 rows were planted in 1995 at 3 locations and evaluated for winterhardiness, drought tolerance, maturity, plant height, disease resistance and agronomic type. A line was selected from the population designated 92x0462 and renamed W96-054W in 1996. Since 1997 Burchett has been tested in replicated yield trials planted in both the southern and central Great Plains. Burchett has been stable and true breeding since 2000.

In 1998 twelve progeny plots were grown in Berthoud, Colorado of which ten were selected and regrown as progeny plots in 1999. Of these progeny plots three were selected and bulked to grow a one acre Breeders seed increase in Berthoud, CO in 2000 which produced 2,000 pounds of Breeders seed. In 2002 two Breeders seed increases were grown in Kansas. One 43.8 Breeders seed acre increase was grown in Sharon Springs, Kansas which produced 61,650 pounds of Foundation of seed. An additional Breeders seed of 30 acres was grown in Garden City, Kansas which produced 99,500 pounds of Foundation seed.

Burchett has been uniform and stable since 2000. Less than 0.8% of the plants were rogued from the Breeders seed increase in 2001. Approximately 90% of the rogued variant plants were taller height wheat plants (8 to 15 cm). Up to 1% variant plants may be encountered in subsequent generations.

Addendum to The Exhibit A:

Burchett is a cross between W91-126/WI88-052-05. W91-126 is a cross between 84PYI003-106/INT.S/W#47. 84PYI003-106 is a cross between F2SPS-102 (a F2 plant selection made in 1976 at Hutchinson, Ks from a bulk of 55 winter wheat crosses) and Tam 101. INT.S/W#47 is a public line – entry #47 in the 5th International Winter/Spring Nursery conducted by CIMMYT. WI88-052-05 is a sister to PVPA line WI88-052-13.

Exhibit B. Statement of Distinctness

Burchett is most similar to the hard white winter wheat 'Oro Blanco'. However it can be distinguished by the following characteristics

- Burchett has a short glume length (Berthoud, CO 2000, 2002). Oro Blanco has a medium glume length (Berthoud, CO 2000, 2002).
- Burchett has a medium glume width (Berthoud, CO 2000, 2002). Oro Blanco has a narrow glume width (Berthoud, CO 2000, 2002).
- Burchett's flag leaf is erect to 90 degree angle from stem at boot stage (Berthoud, CO 2000, 2002). Oro Blanco has a recurved flag leaf at boot stage (Berthoud, CO 2000, 2002).

Exhibit D. Additional Description of Burchett

Burchett is a hard white winter wheat bred and developed by Agripro Wheat. Burchett is adapted to the Central High Plains. Burchett is a medium height semidwarf wheat with medium maturity and good straw. Burchett provides resistance to Soilborne Mosaic Virus and Spindle Streak Mosaic Virus, is moderately resistant to Stripe rust, Wheat Streak Mosiac Virus and is susceptible to Leaf rust.

Juvenile growth habit is semierect. Plant color at boot stage is blue green with a light yellow head. Flag leaf at boot stage is erect to a 90 degree angle from stem and twisted. Waxy bloom is present on the head, stem and flag leaf sheath. Anther color is yellow. Head shape is tapering and awned. Glumes are glabrous, midwide in width and short in length with rounded shoulders and very long acuminate beaks. Seed shape is ovate. Brush hairs are medium in length. Seed crease depth is shallow and width is narrow. Seed cheeks are rounded.

ratings based upon 1 resistant or best, 9 susceptible or worst and observation taken at a minimum of 3 locations SB/SS = soil borne/spindle streak mosaic virus complex SR = stem rust LR = leaf rust

LC = leaf complex, primarily tan spot & leaf blotch

PM = powdery mildew WS = wheat streak mosaic

PPO = poly phenyloxidase reaction, these are estimates data needs verification Sprout = tolerance to pre-harvest sprouting

Two Year Data Comparison with current competition (head to head in same trial)

Exhibit E. Statement of the Basis of Applicant's Ownership

The variety for which Plant Variety Protection is hereby sought was developed by Dr. John Moffatt, an employee of Agripro Wheat, a business unit of Advanta U.S.A., Inc. By agreement between employees and Agripro Wheat all rights to any invention, discovery, or development made by the employee while employed by Agripro Wheat, were assigned to Agripro Wheat, with no rights of any kind pertaining to 'Burchett' being retained by the employees.

By contractual agreement the variety 'Burchett' was purchased from Agripro Wheat, a business unit of Advanta USA, Inc. in June of 1996 and is currently owned by Monsanto Company.
